artemis DV Pro

Camera stabilizing system

Beyond Balance

The artemis DV Pro is the world's first camera stabilizing system to offer operators the full range of professional features. It allows complete control of all adjustments and delivers the flexibility you need to do the perfect job.

The artemis DV Pro's new design optimizes the mass and adds just the right amount of inertia to lightweight, professional cameras. It ensures fast and extremely precise dynamic balance and gives you constant full control of every movement.
